

TEST REPORT

Customer: **Latex Mattress Australia**
4 Barrinia Street
Springwood QLD 4127

Test number: **B3395.1**

The following product was submitted and identified by the customer as:

Description of product: **Cot Mattress**

The product was tested, as requested by the customer, based on the test method in the Australian/New Zealand Standard AS/NZS 8811.1:2013 - Methods of testing infant products - Method 1: Sleep surfaces - Test for firmness.

NOTES:

- 1) Side 1: Textured fabric surface.
Side 2: Textured fabric surface (identical to side 1).
Measured size: (1220 $^{+5}_{-5}$) mm long, (620 $^{+5}_{-5}$) mm wide, (105 $^{+5}_{0}$) mm thick.
- 2) The sample was tested on a horizontal, flat, rigid surface. It was conditioned and tested in an environment according to the temperature and humidity conditions specified in AS/NZS 8811.1:2013.

CONCLUSION:

When the sample was tested in accordance with AS/NZS 8811.1:2013, no contact was observed between the feeler arm of the testing apparatus and the sleep surface or any covering of the mattress—

- At the three designated equidistant test points on the longitudinal centre-line, and
- At any subjective 'worst case' test locations.

Both sides of the mattress were tested.

The results were interpreted as a PASS.

A pass result is obtained in AS/NZS 8811.1:2013 if the feeler arm of the testing apparatus made no contact with the sleep surface or any covering thereof, which means that the product is sufficiently firm.

Tested by:

Antonio Bonacruz
Date tested: 1 Apr 2021

Signed:

Klaus Neuscheler
Manager, Laboratory
